

MUHAMMAD NAJMI BIN MOHD SANUSI

Full Stack Developer (CGPA 3.82) specializing in end-to-end application development, from engineering web scraping pipelines to designing responsive user dashboards. Seeking a **Software Engineering Internship** (3 August 2026 – 6 months) to apply skills in high-concurrency system design and robust web integration.

EXPERIENCE

Independent Developer

JANUARY 2021 - PRESENT

Managed the full development lifecycle for client and self-directed automation services, specializing in Python back-end architecture, and external API integration.

PROJECT

BEATS: BLE-Based Gamified University Attendance System with Lecturer Analytical Dashboard

Full Stack & IoT Developer | C++, Laravel, Vue.js, Inertia.js, Tailwind CSS

- Programmed C++ firmware for ESP32 BLE beacons to broadcast proximity signals and transmit continuous heartbeat pings to a Laravel backend for hardware health monitoring.
- Engineered a cross-platform authentication architecture utilizing Laravel Sanctum for secure Kotlin mobile app API tokens and session-based login for the web portal.
- Built the core attendance engine and real-time Lecturer Portal using the VILT stack to process live BLE/QR check-ins, automate arrival classification (Early/On-Time/Late), and manage leave approval workflows.

Shopee Shop Management & Automation System

Sales Automation | Python

- Engineered automated digital inventory fulfillment system integrated via Discord Python SDK, allowing customers to self-service and redeem digital items instantly using their order IDs.
- Developed a back-end service using the Shopee OpenAPI to monitor and fetch real-time sales, stock levels and order data for shop management.

Network Stress Testing Suite

Concurrency and Performance | Python

- Designed and implemented a high-performance network testing suite to test server stability using Python multiprocessing library after comparing with asyncio, and threading for peak throughput.
- Developed robust logic for proxy rotation and validation, ensuring high request completion for testing endpoints.

EDUCATION

Universiti Kuala Lumpur (Malaysian Institute of Information Technology), Kuala Lumpur — *Diploma in Information Technology*

July 2024 - January 2027 (Expected Graduation)

Dean's List: Achieved 4 times | Latest CGPA: 3.82

CERTIFICATION

App Development with Swift – Associate

Date issued: September 23, 2025 | Expires: September 24, 2030

Kuala Lumpur, Malaysia

+60 11-1058 0065

SKILLS

Languages

Python, Java, SQL (MySQL),
Swift, PHP, HTML, CSS,
Micropython, JavaScript

Others

Flask, FirebaseAI, Google Cloud Platform (GCP), REST APIs, Git, Github, Figma, [Draw.io](#), Threading, Twilio API, Discord SDK, Telegram SDK, Shopee API, Laravel, [Vue.js](#), Tailwind CSS

AWARDS

Huawei ICT Competition 2025 (Cloud Track) | National Finalist

TopCoder Coding Challenge 2025 | Top 20 (National) & 3rd Place (University)

Huawei Innovation Competition | 2nd Preliminary (Pitching level)

Kabel Hackathon | Preliminary

LANGUAGES

Malay, English

EXTRA CURRICULUM

Sub-Exco Marketing and Development
Student Entrepreneur Assoc
2025/26

President
Black Belt Muni's
Taekwondo Club 2023

President
Taekwondo SMKA Melor
2022/23
